## FELYCIN<sup>®</sup>-CA1

These social media posts were created to help you engage your audience in meaningful conversations about Felycin-CA1 and hypertrophic cardiomyopathy (HCM) in cats.

The copy and calls-to-action beneath each image are designed to encourage follow-up, and to strengthen the practitioner-client relationship by promoting awareness and proactive care.

To help us monitor and amplify your posts, please include the following hashtags when sharing:

#PRNPHARMACAL #FELYCINCA1 #HCMINCATS

**IMPORTANT NOTE:** *To avoid FDA scrutiny and the need for fair balance, we ask that you avoid adding product-specific claims or therapeutic language to any additional copy.*

*By keeping the focus on pet health and client education, you can help drive engagement and encourage more frequent feline visits to the clinic.*
